About Me.

A creative, self-motivated individual with a keen eye for detail and an entrepreneurial spirit. Creative technologist thinking with my hands, turning ambiguous ideas into playable prototypes across code, electronics and digital fabrication, from a gesture controlled chopstick to live audio accessibility at Wimbledon. 4 years in the electronic music industry hand-building stages and immersive spaces, and a lifelong learner, biotechnology graduate turned creative technologist and rapid prototyper. I believe playful, hands on making creates deeper connections than any screen alone.

Creative Technologist - HEX Agency, WPP
(June 2025 - Present) wearehex.ai

Experience.

Creative technologist at HEX, WPP's global creative technology collective, building experiential and hardware led work for major brands. Specialise in wearable tech, sensors, IoT and embedded devices, taking projects from concept and PCB design through firmware, 3D printed prototyping and on site delivery. Designed and ran a new computer-vision tracking system for Action Audio at the Wimbledon Championships 2026, converting live ball and player data into real-time 3D audio so blind and low-vision audiences could follow the tennis. Rapid prototyping for brands, including Bibigo Scroll, an nRF52-based BLE controller housed in a chopstick using flick gestures to scroll allowing the user to eat and use TikTok at the same time. Developed Smart Connect, a wearable conference device that exchanges contact details automatically when two users shake hands owning both hardware and software through device firmware, backend server + iOS app. Comfortable owning the full pipeline: electronics, firmware, fabrication, testing and live technical operation.

Creative Event Producer - Wax Palace

(March 2020 - October 2024) @wax.palace www.waxpalace.co.uk

Creative Producer for successful UK-wide events business from concept through to delivery, curating immersive, design-led events, including an annual 500 capacity festival and regular club nights across the UK. Worked as operations director for the Kaleidoscope festival, ensuring smooth operation from build-up to breakdown, and managed all construction planning and design. Demonstrated proficiency in power distribution, logistical coordination, supplier liaison, and safe structure erection. Creative producer and art director for club night events across the UK, working with large venues and companies, including Boilerroom. Using experimental design to reflect the music and artists performing, combining practical design elements with microelectronics and creative coding.

Skills + Proficiencies.

- * Rapid Prototyping
- * Conceptual Creative Design
- * Playtesting + Iteration
- * Project Management
- * Team Leadership
- * Cross-team Collaboration
- * Budgeting
- * Flexibility and Adaptability

Embedded Systems (ESP32, nRF52)
PCB Design + Prototyping
C / C++ Firmware
Python
HTML, CSS + JavaScript
3D Printing + Fabrication
Unreal Engine
Computer Vision

Education.

Creative Technology Apprenticeship, WPP
October 2024 - June 2025

BSc Biotechnology with Enterprise - 2:1
University of Leeds, 2019 - 2022
